## CONTENTS

Abstracted/indexed in: BIOSIS, CAB Abstracts International, CAB Health, Chemical Abstracts, EMBASE, Index Medicus, Medline. Also covered in the abstract and citation database SciVerse SCOPUS®. Full text available on SciVerse ScienceDirect®

### Food biotechnology

Edited by Elaine E Vaughan and Jeroen Hugenholtz

- 121 **Elaine E Vaughan and Jeroen Hugenholtz**  
Editorial overview: Food biotechnology
- 124 **Jan Martinussen, Christian Solem, Anders Koefoed Holm and Peter Ruhdal Jensen**  
Engineering strategies aimed at control of acidification rate of lactic acid bacteria
- 130 **Eileen F O' Shea, Paul D Cotter, R Paul Ross and Colin Hill**  
Strategies to improve the bacteriocin protection provided by lactic acid bacteria
- 135 **James Steele, Jeffery Broadbent and Jan Kok**  
Perspectives on the contribution of lactic acid bacteria to cheese flavor development
- 142 **Yanping Zhang and Yin Li**  
Engineering the antioxidative properties of lactic acid bacteria for improving its robustness
- 148 **Eddy J Smid and Christophe Lacroix**  
Microbe-microbe interactions in mixed culture food fermentations
- 155 **Jeroen Hugenholtz**  
Traditional biotechnology for new foods and beverages
- 160 **Jean Guy LeBlanc, Christian Milani, Graciela Savoy de Giori, Fernando Sesma, Douwe van Sinderen and Marco Ventura**  
Bacteria as vitamin suppliers to their host: a gut microbiota perspective
- 169 **René B Draaisma, René H Wijffels, PM (Ellen) Siegers, Laura B Brentner, Adip Roy and Maria J Barbosa**  
Food commodities from microalgae
- 178 **Sacha AFT van Hijum, Elaine E Vaughan and Rudi F Vogel**  
Application of state-of-art sequencing technologies to indigenous food fermentations
- 187 **Christel Garrigues, Eric Johansen and Ross Crittenden**  
Pangenomics – an avenue to improved industrial starter cultures and probiotics
- 192 **Anthony R Borneman, Isak S Pretorius and Paul J Chambers**  
Comparative genomics: a revolutionary tool for wine yeast strain development
- 200 **Filipe Branco dos Santos, Willem M de Vos and Bas Teusink**  
Towards metagenome-scale models for industrial applications – the case of Lactic Acid Bacteria
- 207 **Maria L Marco and Sybille Tachon**  
Environmental factors influencing the efficacy of probiotic bacteria
- 214 **Daniela Barile and Robert A Rastall**  
Human milk and related oligosaccharides as prebiotics
- 220 **Selin Bolca, Tom Van de Wiele and Sam Possemiers**  
Gut metabolotypes govern health effects of dietary polyphenols

### Plant biotechnology

Edited by Natalia Dudareva and Dean DellaPenna

- 226 **Natalia Dudareva and Dean DellaPenna**  
Editorial overview: Plant metabolic engineering: future prospects and challenges

- 229 **Mark Stitt**  
Progress in understanding and engineering primary plant metabolism
- 239 **Uwe Heinig, Michael Gutensohn, Natalia Dudareva and Asaph Aharoni**  
The challenges of cellular compartmentalization in plant metabolic engineering
- 247 **Yair Shachar-Hill**  
Metabolic network flux analysis for engineering plant systems
- 256 **Andreas PM Weber and Andrea Bräutigam**  
The role of membrane transport in metabolic engineering of plant primary metabolism
- 263 **Hussam Hassan Nour-Eldin and Barbara Ann Halkier**  
The emerging field of transport engineering of plant specialized metabolites
- 271 **Cristiana Gomes de Oliveira Dal'Molin and Lars Keld Nielsen**  
Plant genome-scale metabolic reconstruction and modelling
- 278 **Louis MT Bradbury, Tom D Niehaus and Andrew D Hanson**  
Comparative genomics approaches to understanding and manipulating plant metabolism
- 285 **Keiko Yonekura-Sakakibara, Atsushi Fukushima and Kazuki Saito**  
Transcriptome data modeling for targeted plant metabolic engineering
- 291 **Peng Xu, Namita Bhan and Mattheos AG Koffas**  
Engineering plant metabolism into microbes: from systems biology to synthetic biology
- 300 **Bensheng Liu and Christoph Benning**  
Lipid metabolism in microalgae distinguishes itself
- 310 **Arren Bar-Even and Dan Salah Tawfik**  
Engineering specialized metabolic pathways—is there a room for enzyme improvements?
- 320 **Jan Jirschitzka, Derek Joseph Mattern, Jonathan Gershenzon and John Charles D'Auria**  
Learning from nature: new approaches to the metabolic engineering of plant defense pathways
- 329 **Richard A Dixon, Chenggang Liu and Ji Hyung Jun**  
Metabolic engineering of anthocyanins and condensed tannins in plants
- 336 **Nicholas D Bonawitz and Clint Chapple**  
Can genetic engineering of lignin deposition be accomplished without an unacceptable yield penalty?
- 344 **Cathie Martin**  
The interface between plant metabolic engineering and human health
- 354 **Weslee S Glenn, Weerawat Runguphan and Sarah E O'Connor**  
Recent progress in the metabolic engineering of alkaloids in plant systems

### The cover

Plants as production platforms. Broccoli, opium poppy and Madagascar periwinkle are used for the production of important metabolites. (See the review by Glenn, Runguphan and O'Connor, this issue, online version.)
