## CONTENTS

Abstracted/indexed in: BIOSIS, CAB Abstracts International, CAB Health, Chemical Abstracts, EMBASE, Index Medicus, Medline. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®

### Nanobiotechnology

Edited by Michael C Jewett and Fernando Patolsky

- 551 **Michael C Jewett and Fernando Patolsky**  
Editorial overview: Nanobiotechnology: synthetic biology meets materials science
- 555 **Veikko Linko and Hendrik Dietz**  
The enabled state of DNA nanotechnology
- 562 **Fuan Wang, Bilha Willner and Itamar Willner**  
DNA nanotechnology with one-dimensional self-assembled nanostructures
- 575 **Adrien Padirac, Teruo Fujii and Yannick Rondelez**  
Nucleic acids for the rational design of reaction circuits
- 581 **Chad Schwartz and Peixuan Guo**  
Ultraprecise pRNA hexameric ring gearing hexameric phi29 DNA-packaging motor by revolving without rotating and coiling
- 591 **Nediljko Budisa**  
Expanded genetic code for the engineering of ribosomally synthesized and post-translationally modified peptide natural products (RiPPs)
- 599 **Jung-Ho Lee, Jae Hun Lee, Yun Jung Lee and Ki Tae Nam**  
Protein/peptide based nanomaterials for energy application
- 606 **Ofer Idan and Henry Hess**  
Engineering enzymatic cascades on nanoscale scaffolds
- 612 **Chenbo Dong and Cerasela Zoica Dinu**  
Molecular trucks and complementary tracks for bionanotechnology applications
- 620 **Mark Thomas Smith, Anna K Hawes and Bradley Charles Bundy**  
Reengineering viruses and virus-like particles through chemical functionalization strategies
- 627 **Edward Y Kim and Danielle Tullman-Ercek**  
Engineering nanoscale protein compartments for synthetic organelles
- 633 **Pasquale Stano and Pier Luigi Luisi**  
Semi-synthetic minimal cells: origin and recent developments
- 639 **Annghelen Lu and Rachel K O'Reilly**  
Advances in nanoreactor technology using polymeric nanostructures
- 646 **Utsav Agrawal, Daniel T Reilly and Charles M Schroeder**  
Zooming in on biological processes with fluorescence nanoscopy
- 654 **Moria Kwiat, Daniel Stein and Fernando Patolsky**  
Nanotechnology meets electrophysiology
- 664 **Sharon Fleischer and Tal Dvir**  
Tissue engineering on the nanoscale: lessons from the heart
- 672 **Yoram Cohen and Shani Yariv Shoushan**  
Magnetic nanoparticles-based diagnostics and theranostics
- 682 **Anat Eldar-Boock, Dina Polyak, Anna Scomparin and Ronit Satchi-Fainaro**  
Nano-sized polymers and liposomes designed to deliver combination therapy for cancer
- 690 **Michal Levy-Sakin and Yuval Ebenstein**  
Beyond sequencing: optical mapping of DNA in the age of nanotechnology and nanoscopy
- 699 **Daniel H Stoloff and Meni Wanunu**  
Recent trends in nanopores for biotechnology
- 705 **Amir Goldbourt**  
Biomolecular magic-angle spinning solid-state NMR: recent methods and applications

- 716 **M Kornreich, R Avinery and R Beck**  
Modern X-ray scattering studies of complex biological systems
- 724 **Ken Donaldson and Craig A Poland**  
Nanotoxicity: challenging the myth of nano-specific toxicity

### Systems biology

Edited by Orkun S Soyer and Peter S Swain

- 735 **Orkun S Soyer and Peter S Swain**  
Editorial overview: Systems and synthetic biology underpinning biotechnology
- 737 **Fredrik Persson, Irmeli Barkefors and Johan Elf**  
Single molecule methods with applications in living cells
- 745 **Keith R Willison and David R Klug**  
Quantitative single cell and single molecule proteomics for clinical studies
- 752 **KA Geller-Samerotte, CR Bauer, S Li, N Ziv, D Gresham and ML Siegal**  
The details in the distributions: why and how to study phenotypic variability
- 760 **Jesse W Cotari, Guillaume Voisinne and Grégoire Altan-Bonnet**  
Diversity training for signal transduction: leveraging cell-to-cell variability to dissect cellular signaling, differentiation and death
- 767 **Paul Kirk, Thomas Thorne and Michael PH Stumpf**  
Model selection in systems and synthetic biology
- 775 **Guillaume Diss, Marie Fliteau, Luca Freschi, Jean-Baptiste Leducq, Samuel Rochette, Francisco Torres-Quiroz and Christian R Landry**  
Integrative avenues for exploring the dynamics and evolution of protein interaction networks
- 784 **Lori Clay and Yves Barral**  
New approaches to an age-old problem
- 790 **Susan Chen, Patrick Harrigan, Benjamin Heineike, Jacob Stewart-Ornstein and Hana El-Samad**  
Building robust functionality in synthetic circuits using engineered feedback regulation
- 797 **Marjon GJ de Vos, Frank J Poelwijk and Sander J Tans**  
Optimality in evolution: new insights from synthetic biology
- 803 **Alejandro Burga and Ben Lehner**  
Predicting phenotypic variation from genotypes, phenotypes and a combination of the two
- 810 **Sharon Greenblum, Hsuan-Chao Chiu, Roie Levy, Rogan Carr and Elhanan Borenstein**  
Towards a predictive systems-level model of the human microbiome: progress, challenges, and opportunities
- 821 **Siobhán O'Brien, David J Hodgson and Angus Buckling**  
The interplay between microevolution and community structure in microbial populations

### The cover

Super-resolution image showing the chemotaxis receptor protein McpB (red) on the surface of *Bacillus subtilis* cells (green: membrane stain; blue: DAPI stain for DNA) obtained using STORM imaging. Under these growth conditions, McpB proteins localize laterally along the cell surface. Figure Credit: Utsav Agrawal, Hanna Rao, Chris Rao, Charles M Schroeder.
