

Jan van der Meer & Greg N Stephanopoulos, Editors

**April 2017**

## Food biotechnology

Edited by Patrick Stover and Saurabh Mehta

## Plant biotechnology

Edited by Dominique Van Der Straeten, Hans De Steur and Teresa B Fitzpatrick

**June 2017** Energy biotechnology • Environmental biotechnology

**August 2017** Systems biology • Nanobiotechnology

**October 2017** Tissue, cell and pathway engineering

**December 2017** Chemical biotechnology • Pharmaceutical biotechnology

**February 2018** Food biotechnology • Plant biotechnology

## CONTENTS

Abstracted/indexed in: BIOSIS, CAB Abstracts International, CAB Health, Chemical Abstracts, EMBASE, Index Medicus, Medline. Also covered in the abstract and citation database SCOPUS<sup>®</sup>. Full text available on ScienceDirect<sup>®</sup>

- v Patrick J Stover and Saurabh Mehta  
Editorial overview: Food biotechnology

- vii Dominique Van Der Straeten, Teresa B Fitzpatrick and Hans De Steur  
Editorial overview: Biofortification of crops: achievements, future challenges, socio-economic, health and ethical aspects

### Food biotechnology

Edited by Patrick Stover and Saurabh Mehta

- 27 Alison Louise Van Eenennaam  
Genetic modification of food animals
- 35 Lorraine Brennan  
Use of metabotyping for optimal nutrition
- 39 Denise Marie Ney and Mark Raymond Etzel  
Designing medical foods for inherited metabolic disorders: why intact protein is superior to amino acids
- 52 Daniel J Raiten and Ashley M Aimone  
The intersection of climate/environment, food, nutrition and health: crisis and opportunity
- 63 Michelle K McGuire and Mark A McGuire  
Got bacteria? The astounding, yet not-so-surprising, microbiome of human milk
- 69 Takayuki Yamamoto, Takahiro Shimoyama and Moeko Kuriyama  
Dietary and enteral interventions for Crohn's disease
- 74 Yun Wang and Timothy V Duncan  
Nanoscale sensors for assuring the safety of food products
- 87 Mary Eleftheriadou, Georgios Pyrgiotakis and Philip Demokritou  
Nanotechnology to the rescue: using nano-enabled approaches in microbiological food safety and quality
- 94 Maria L Marco, Dustin Heeney, Sylvie Binda, Christopher J Cifelli, Paul D Cotter, Benoit Foligné, Michael Gänzle, Remco Kort, Gonca Pasin, Anne Pihlanto, Eddy J Smid and Robert Hutkins  
Health benefits of fermented foods: microbiota and beyond
- 103 Balaji Srinivasan, Seoho Lee, David Erickson and Saurabh Mehta  
Precision nutrition – review of methods for point-of-care assessment of nutritional status
- 109 Rumana Yasmeen, Naomi K Fukagawa and Thomas TY Wang  
Establishing health benefits of bioactive food components: a basic research scientist's perspective
- 124 David Francis, John J Finer and Erich Grotewold  
Challenges and opportunities for improving food quality and nutrition through plant biotechnology

- 138 Julia L Finkelstein, Jere D Haas and Saurabh Mehta  
Iron-biofortified staple food crops for improving iron status: a review of the current evidence

- 146 Patrick J Stover, Jane Durga and Martha S Field  
Folate nutrition and blood–brain barrier dysfunction

- 198 Jeffrey I Lipton  
Printable food: the technology and its application in human health

### Plant biotechnology

Edited by Dominique Van Der Straeten, Hans De Steur and Teresa B Fitzpatrick

### Biofortification: Vitamins & micronutrients

- 1 Aymeric Goyer  
Thiamin biofortification of crops
- 8 Marta W Vasconcelos, Wilhelm Gruijssem and Navreet K Bhullar  
Iron biofortification in the 21st century: setting realistic targets, overcoming obstacles, and new strategies for healthy nutrition
- 16 Silvia Gonzali, Claudia Kiferle and Pierdomenico Perata  
Iodine biofortification of crops: agronomic biofortification, metabolic engineering and iodine bioavailability
- 115 Joana Díaz-Gómez, Richard M Twyman, Changfu Zhu, Gemma Farré, José CE Serrano, Manuel Portero-Otin, Pilar Muñoz, Gerhard Sandmann, Teresa Capell and Paul Christou  
Biofortification of crops with nutrients: factors affecting utilization and storage
- 130 Jared Fudge, Nathalie Mangel, Wilhelm Gruijssem, Hervé Vanderschuren and Teresa B Fitzpatrick  
Rationalising vitamin B<sub>6</sub> biofortification in crop plants
- 153 Richard C Macknight, William A Laing, Sean M Bulley, Ronan C Broad, Alexander AT Johnson and Roger P Hellens  
Increasing ascorbate levels in crops to enhance human nutrition and plant abiotic stress tolerance
- 169 Giovanni Giuliano  
Provitamin A biofortification of crop plants: a gold rush with many miners
- 189 Laurent Mène-Saffrané and Sébastien Pellaud  
Current strategies for vitamin E biofortification of crops
- 202 Simon Strobbe and Dominique Van Der Straeten  
Folate biofortification in food crops

## Biofortification: Socio-economic, health and ethical aspects

- 46 **Sara Glass and Jessica Fanzo**  
Genetic modification technology for nutrition and improving diets: an ethical perspective
- 161 **Hans De Steur, Matty Demont, Xavier Gellynck and Alexander J Stein**  
The social and economic impact of biofortification through genetic modification

- 181 **Hans De Steur, Saurabh Mehta, Xavier Gellynck and Julia L Finkelstein**  
GM biofortified crops: potential effects on targeting the micronutrient intake gap in human populations

## The cover

The coordinated maternal/infant microbiome during breastfeeding is likely influenced by a variety of biological, environmental, and behavioral factors (See Michelle K McGuire, Mark A McGuire, pages 63–68, this issue)
