Editorial overview: Energy biotechnology: Biotechnology solutions for our energy needs

- vii **Irene Sanchez-Andrea and Mike Jetten**  
Editorial overview: Microbial environmental biotechnology

## Energy Biotechnology

Edited by Hal Alper and Akihiko Kondo

- 1 **Helen S Toogood and Nigel S Scrutton**  
Retooling microorganisms for the fermentative production of alcohols
- 11 **Juli Wang and Kun Zhu**  
Microbial production of alka(e)ne biofuels
- 19 **Ke Xu, Bo Lv, Yi-Xin Huo and Chun Li**  
Toward the lowest energy consumption and emission in biofuel production: combination of ideal reactors and robust hosts
- 25 **Zhidan Liu, Buchun Si, Jiaming Li, Jianwei He, Chong Zhang, Yuan Lu, Yuanhui Zhang and Xin-Hui Xing**  
Bioprocess engineering for biohythane production from low-grade waste biomass: technical challenges towards scale up
- 32 **Wenlong Cai and Wenjun Zhang**  
Engineering modular polyketide synthases for production of biofuels and industrial chemicals
- 39 **Eko Roy Marella, Carina Holkenbrink, Verena Siewers and Irina Borodina**  
Engineering microbial fatty acid metabolism for biofuels and biochemicals
- 47 **Robert Mans, Jean-Marc G Daran and Jack T Pronk**  
Under pressure: evolutionary engineering of yeast strains for improved performance in fuels and chemicals production
- 57 **Shinji Hama, Hideo Noda and Akihiko Kondo**  
How lipase technology contributes to evolution of biodiesel production using multiple feedstocks
- 65 **Morgan M Matson and Shota Atsumi**  
Photomixotrophic chemical production in cyanobacteria
- 72 **Ja Kyong Ko and Sun-Mi Lee**  
Advances in cellulosic conversion to fuels: engineering yeasts for cellulosic bioethanol and biodiesel production
- 81 **R Kyle Bennett, Lisa M Steinberg, Wilfred Chen and Eleftherios T Papoutsakis**  
Engineering the bioconversion of methane and methanol to fuels and chemicals in native and synthetic methylotrophs

- 94 **Guo-Qiang Chen and Xiao-Ran Jiang**  
Next generation industrial biotechnology based on extremophilic bacteria
- 101 **Yi-di Chen, Shih-Hsin Ho, Dillirani Nagarajan, Nan-qi Ren and Jo-Shu Chang**  
Waste biorefineries – integrating anaerobic digestion and microalgae cultivation for bioenergy production
- 111 **Yoshiaki Maeda, Tomoko Yoshino, Tadashi Matsunaga, Mitsufumi Matsumoto and Tsuyoshi Tanaka**  
Marine microalgae for production of biofuels and chemicals
- 136 **Gopalakrishnan Kumar, Sutha Shobana, Dillirani Nagarajan, Duu-Jong Lee, Kuo-Shing Lee, Chiu-Yue Lin, Chun-Yen Chen and Jo-Shu Chang**  
Biomass based hydrogen production by dark fermentation – recent trends and opportunities for greener processes
- 174 **Christopher M Humphreys and Nigel P Minton**  
Advances in metabolic engineering in the microbial production of fuels and chemicals from C1 gas
- 182 **Kengo Sasaki, Daisuke Sasaki, Kazuhide Kamiya, Shuji Nakanishi, Akihiko Kondo and Souichiro Kato**  
Electrochemical biotechnologies minimizing the required electrode assemblies

## Environmental Biotechnology

Edited by Mike Jetten and Irene Sánchez Andrea

- 121 **Christian Zerbe, Jing Chen and Orkun S Soyer**  
Engineering microbial communities using thermodynamic principles and electrical interfaces
- 128 **Sara Cantera, Raúl Muñoz, Raquel Lebrero, Juan Carlos López, Yadira Rodríguez and Pedro Antonio García-Encina**  
Technologies for the bioconversion of methane into more valuable products
- 146 **Ioannis Mougialos, Elleke F Bosma, Joyshree Ganguly, John van der Oost and Richard van Kranenburg**  
Hijacking CRISPR-Cas for high-throughput bacterial metabolic engineering: advances and prospects
- 158 **Christopher E Lawson and Sebastian Lücker**  
Complete ammonia oxidation: an important control on nitrification in engineered ecosystems?
- 166 **Fabian Beeckman, Hans Motte and Tom Beeckman**  
Nitrification in agricultural soils: impact, actors and mitigation
- 189 **Ludmila Chistoserdova**  
Applications of methylotrophs: can single carbon be harnessed for biotechnology?

- 195 **Nico Joannes Claassens, Irene Sánchez-Andrea, Diana Zita Sousa and Arren Bar-Even**  
Towards sustainable feedstocks: A guide to electron donors for microbial carbon fixation
- 206 **Catarina Loureiro, Marnix H Medema, John van der Oost and Detmer Sipkema**  
Exploration and exploitation of the environment for novel specialized metabolites
- 214 **Shelesh Agrawal, Dries Seuntjens, Pieter De Cocker, Susanne Lackner and Siegfried E Vlaeminck**  
Success of mainstream partial nitrification/anammox demands integration of engineering, microbiome and modeling insights

- 222 **Maartje AHJ van Kessel, Karin Stultjens, Monique FW Slegers, Simon Guerrero Cruz, Mike SM Jetten, Boran Kartal and Huub JM Op den Camp**  
Current perspectives on the application of N-damo and anammox in wastewater treatment

---

#### The cover

Fluorescence In Situ Hybridization micrograph of a co-culture oxidizing methane and ammonium under anaerobic conditions. The scale bar represents 20  $\mu\text{m}$ .
