## CONTENTS

Abstracted/indexed in: BIOSIS, CAB Abstracts International, CAB Health, Chemical Abstracts, EMBASE, Index Medicus, Medline. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®

- iv **Mark Howarth and Alfonso Jaramillo**  
Editorial overview: Nanobiotechnology: Baby steps and giant strides towards molecular mastery

- vii **Nathan D Price and Eran Segal**  
Editorial overview: Systems biology: Data, discovery, delivery

### NanoBiotechnology

Edited by Alfonso Jaramillo and Mark Howarth

- 1 **Jefferson S Plegaria and Cheryl A Kerfeld**  
Engineering nanoreactors using bacterial microcompartment architectures
- 8 **Kyung Hyun Lee, Kiyofumi Hamashima, Michiko Kimoto and Ichiro Hirao**  
Genetic alphabet expansion biotechnology by creating unnatural base pairs
- 16 **Anusuya Banerjee and Mark Howarth**  
Nanoteamwork: covalent protein assembly beyond duets towards protein ensembles and orchestras
- 24 **RJ Eveline Li, Sandra J van Vliet and Y van Kooyk**  
Using the glycan toolbox for pathogenic interventions and glycan immunotherapy
- 32 **Andreas K Brödel, Mark Isalan and Alfonso Jaramillo**  
Engineering of biomolecules by bacteriophage directed evolution
- 39 **Ken'ya Furuta and Akane Furuta**  
Re-engineering of protein motors to understand mechanisms biasing random motion and generating collective dynamics
- 47 **Willem Kasper Spoelstra, Siddharth Deshpande and Cees Dekker**  
Tailoring the appearance: what will synthetic cells look like?
- 80 **Shaoying Wang, Zhengyi Zhao, Farzin Haque and Peixuan Guo**  
Engineering of protein nanopores for sequencing, chemical or protein sensing and disease diagnosis

### Systems biology

Edited by Nathan Price and Eran Segal

- 57 **Stavros Bashiardes, Anastasia Godneva, Eran Elinav and Eran Segal**  
Towards utilization of the human genome and microbiome for personalized nutrition

- 64 **Chih-Chung Kuo, Austin WT Chiang, Isaac Shamie, Mojtaba Samoudi, Jahir M Gutierrez and Nathan E Lewis**  
The emerging role of systems biology for engineering protein production in CHO cells

- 70 **Laura J Dunphy and Jason A Papin**  
Biomedical applications of genome-scale metabolic network reconstructions of human pathogens

- 90 **Stefania Magnúsdóttir and Ines Thiele**  
Modeling metabolism of the human gut microbiome

- 97 **Arthur P Goldberg, Balázs Szigeti, Yin Hoon Chew, John AP Sekar, Yosef D Roth and Jonathan R Karr**  
Emerging whole-cell modeling principles and methods

- 103 **Shu Pan and Jennifer L Reed**  
Advances in gap-filling genome-scale metabolic models and model-driven experiments lead to novel metabolic discoveries

- 109 **José Reyes and Galit Lahav**  
Leveraging and coping with uncertainty in the response of individual cells to therapy

- 116 **Hualan Liu and Adam M Deutschbauer**  
Rapidly moving new bacteria to model-organism status

- 123 **Paul Kearney, J Jay Boniface, Nathan D Price and Leroy Hood**  
The building blocks of successful translation of proteomics to the clinic

- 130 **James T Yurkovich and Bernhard O Palsson**  
Quantitative -omic data empowers bottom-up systems biology

- 137 **Philippe A Robert, Andrea LJ Marschall and Michael Meyer-Hermann**  
Induction of broadly neutralizing antibodies in Germinal Centre simulations

- 146 **Beatriz Peñalver Bernabé, Lauren Cralle and Jack A Gilbert**  
Systems biology of the human microbiome

### The cover

Image of moving actin filaments on a hybrid motor-coated surface generated using a temporal-colour code. The actin filaments were driven by the hybrid Lifeact-dynein motors. The images from a movie were colour coded and superimposed on top of one another so that moving filaments leave the traces with rainbow colours. The temporal-colour code scale is shown at the bottom of the image. The width of the image is 55 µm.
