Breeding together: modeling synchrony in productivity in a seabird community

Articles

Reconstructing patterns of temperature, phenology, and frost damage over 124 years:

Spring damage risk is increasing

Janzen-Connell effects in a broadcast-spawning Caribbean coral: distance-dependent survival of larvae and settlers

Variability in winter climate and winter extremes reduces population growth of an alpine butterfly

CONTENTS

1 Editorial

Reports

3
Breeding together: modeling synchrony in productivity in a seabird community • JOSÉ J. LAHOZ-MONFORT, BYRON J. T. MORGAN, MICHAEL P. HARRIS, FRANCIS DAUNT, SARAH WANLESS, AND STEPHEN N. FREEMAN

11
Costs, benefits, and fitness consequences of different migratory strategies • JOSÉ A. ALVES, TÓMAS G. GUNNARSSON, DANIEL B. HAYHOW, GRAHAM F. APPLETON, PETER M. POTTS, WILLIAM J. SUTHERLAND, AND JENNIFER A. GILL

18
Biogeographic and phylogenetic effects on feeding resistance of generalist herbivores toward plant chemical defenses • JONATHAN D. CRAFT, VALERIE J. PAUL, AND ERIK E. SOTKA

25
Intrinsic time dependence in the diversity-invasibility relationship • GRAEME F. CLARK, EMMA L. JOHNSTON, AND BRIAN LEUNG

Articles

32
Species invasion alters local adaptation to soil communities in a native plant • RICHARD A. LANKAU

41
Reconstructing patterns of temperature, phenology, and frost damage over 124 years: Spring damage risk is increasing • CAROL K. AUGSPURGER

51
Demand-driven resource investment in annual seed production by a perennial angiosperm precludes resource limitation • TAKASHI Y. IDA, LAWRENCE D. HARDER, AND GAKU KUDO

62
Resource availability and imbalance affect plant-mycorrhizal interactions: a field test of three hypotheses • EMILY GRMAN AND TODD M. P. ROBINSON

72
Negative and matrix-dependent effects of dispersal corridors in an experimental metacommunity • JENS ÅSTRÖM AND TOMAS PÄRT

83
Large-scale spatial synchrony and cross-synchrony in acorn production by two California oaks • WALTER D. KOENIG AND JOHANNES M. H. KNOPS

94
Nutrient-specific solubility patterns of leaf litter across 41 lowland tropical woody species • LAURA A. SCHREEG, MICHELLE C. MACK, AND BENJAMIN L. TURNER

106
Nutrients and defoliation increase soil carbon inputs in grassland • CARLY ZITER AND ANDREW S. MACDOUGALL

117
Ecosystem attributes related to tidal wetland effects on water quality • S. FINDLAY AND D. FISCHER

126
Competition in benthic marine invertebrates: the unrecognized role of exploitative competition for oxygen • NICK FERGUSON, CRAIG R. WHITE, AND DUSTIN J. MARSHALL

136
Biogenic habitat transitions influence facilitation in a marine soft-sediment ecosystem • ANDREW M. LOHRER, IVÁN F. RODIL, MICHAEL TOWNSEND, LUCA D. CHIARONI, JUDI E. HEWITT, AND SIMON F. THRUSH

146
Janzen-Connell effects in a broadcast-spawning Caribbean coral: distance-dependent survival of larvae and settlers • K. L. MARHAVER, M. J. A. VERMEIJ, F. ROHWER, AND S. A. SANDIN

161
Variable intertidal temperature explains why disease endangers black abalone • TAL BEN-HORIN, HUNTER S. LENIHAN, AND KEVIN D. LAFFERTY
