Do invasive species perform better in their new ranges?

Historical thermal regimes define limits to coral acclimatization

The effects of physical stress and herbivores on intertidal seaweed biodiversity

Exogenous carbon extend the realized niche of canopy lichens? Evidence from sub-boreal forests in British Columbia

CONTENTS

Articles

985

Do invasive species perform better in their new ranges? • JOHN D. PARKER, MARK E. TORCHIN, RUTH A. HUFBAUER, NATHAN P. LEMOINE, CHRISTINA ALBA, DANA M. BLUMENTHAL, OLIVER BOSSDORF, JAMES E. BYERS, ALISON M. DUNN, ROBERT W. HECKMAN, MARTIN HEJDA, VOJTĚCH JAROŠÍK, ANDREW R. KANAREK, LYNN B. MARTIN, SARAH E. PERKINS, PETR PYŠEK, KRISTINA SCHIERENBECK, CARMEN SCHLÖDER, RIEKS VAN KLINKEN, KURT J. VAUGHN, WYATT WILLIAMS, AND LORNE M. WOLFE

995

Greater sexual reproduction contributes to differences in demography of parasitoid effects • JEAN H. BURNS, ELEANOR A. PARDINI, MICHELE R. SCHUTZENHOFFER, Y. ANNY CHUNG, KATIE J. SEIDLER, AND TIFFANY M. KNIGHT

1005

Cytotype differences modulate eco-geographical differentiation in the widespread plant *Centaurea stoebe* • MIN A. HAHN AND HEINZ MÜLLER-SCHÄRER

1015

Does enemy loss cause release? A biogeographical comparison of parasitoid effects on an introduced insect • KIRSTEN M. PRIOR AND JESSICA J. HELLMANN

1025

Genetic diversity within a dominant plant outweighs plant species diversity in structuring an arthropod community • KERRI M. CRAWFORD AND JENNIFER A. RUDGERS

1036

Gradient-based habitat affinities predict species vulnerability to drought • DIANE M. DEBINSKI, JENNET C. CARUTHERS, DIANNE COOK, JASON CROWLEY, AND HADLEY WICKHAM

1046

Ontogenetic functional diversity: Size structure of a keystone predator drives functioning of a complex ecosystem • VOLKER H. W. RUDOLF AND NICK L. RASMUSSEN

1057

Predator density and timing of arrival affect reef fish community assembly • ADRIAN C. STIER, SHANE W. GEANGE, KATE M. HANSON, AND BENJAMIN M. BOLKER

1069

Two's company, three's a crowd: Food and shelter limitation outweigh the benefits of group living in a shoaling fish • JOHN R. FORD AND STEPHEN E. SWEARER

1078

Historical thermal regimes define limits to coral acclimatization • EMILY J. HOWELLS, RAY BERKELMANS, MADELEINE J. H. VAN OPPEN, BETTE L. WILLIS, AND LINE K. BAY

1089

Additive effects of physical stress and herbivores on intertidal seaweed biodiversity • SUSAN L. WILLIAMS, MATTHEW E. S. BRACKEN, AND EMILY JONES

1102

Reddened seascapes: experimentally induced shifts in 1/f spectra of spatial variability in rocky intertidal assemblages • LAURA TAMBURELLO, FABIO BULLERI, IACOPO BERTOCCI, ELENA MAGGI, AND LISANDRO BENEDETTI-CECCHI

1112

Mammal predator and prey species richness are strongly linked at macroscales • CHRISTOPHER SANDOM, LARS DALBY, CAMILLA FLØJGAARD, W. DANIEL KISSLING, JONATHAN LENOIR, BRODY SANDEL, KRISTIAN TRØJELSGAARD, RASMUS EJRNÆS, AND JENS-CHRISTIAN SVENNING

1123

Asynchronous food-web pathways could buffer the response of Serengeti predators to El Niño Southern Oscillation • A. R. E. SINCLAIR, KRISTINE L. METZGER, JOHN M. FRYXELL, CRAIG PACKER, ANDREA E. BYROM, MEGGAN E. CRAFT, KATIE HAMPSON, TIZIANA LEMBO, SARAH M. DURANT, GUY J. FORRESTER, JOHN BUKOMBE, JOHN MCHETTO, JAN DEMPEWOLF, RAY HILBORN, SARAH CLEAVELAND, ALLY NKWABI, ANNA MOSSER, AND SIMON A. R. MDUMA
