CONTENTS

Articles

- Towards generating highly detailed 3D CityGML models from OpenStreetMap
M. Goetz 845
- Network-based space-time search-window technique for hotspot detection of street-level crime incidents
S. Shiode and N. Shiode 866
- Continuous surface representation and approximation: spatial analytical implications
J. Yao and A.T. Murray 883
- Efficient encoding and spatial operation scheme for aperture 4 hexagonal discrete global grid system
X. Tong, J. Ben, Y. Wang, Y. Zhang and T. Pei 898
- An improved artificial immune system for seeking the Pareto front of land-use allocation problem in large areas
K. Huang, X. Liu, X. Li, J. Liang and S. He 922
- Pedestrian network map generation approaches and recommendation
H.A. Karimi and P. Kasemsuppakorn 947
- On the hyperfield or field-of-field concept
K. Kjenstad 963
- Fusing remote sensing with sparse demographic data for synthetic population generation: an algorithm and application to rural Afghanistan
S.M. Mussavi Rizi, M.M. Latek and A. Geller 986
- Multimodal accessibility modeling from coarse transportation networks in Africa
J.-P. Kibambe Lubamba, J. Radoux and P. Defourny 1005
- Parallel optimal choropleth map classification in PySAL
S.J. Rey, L. Anselin, R. Pahle, X. Kang and P. Stephens 1023
- Book Reviews** 1040

Articles

- Artificial surfaces simulating complex terrain types for evaluating grid-based flow direction algorithms
C.-Z. Qin, L.-L. Bao, A.-X. Zhu, X.-M. Hu and B. Qin 1055
- A genetic algorithm for multiobjective dangerous goods route planning
R. Li, Y. Leung, B. Huang and H. Lin 1073
- A formalization for semantic location granules
J. Bernad, C. Bobed, E. Mena and S. Ilarri 1090

2849

- A performance, semantic and service quality-enhanced distributed search engine
for improving geospatial resource discovery 1109
Z. Gui, C. Yang, J. Xia, K. Liu, C. Xu, J. Li and P. Lostritto
- A spatial data infrastructure model from the computational viewpoint 1133
*A.K. Cooper, H. Moellering, J. Hjelmager, P. Rapant, T. Delgado, D. Laurent, S. Coetzee,
D.M. Danko, U. Düren, A. Iwaniak, J. Brodeur, P. Abad, M. Huet and A. Rajabifard*
- Parallel agent-based simulation of individual-level spatial interactions within a multicore
computing environment 1152
Z. Gong, W. Tang, D.A. Bennett and J.-C. Thill
- How much information is geospatially referenced? Networks and cognition 1171
S. Hahmann and D. Burghardt
- LOST-Tree: a spatio-temporal structure for efficient sensor data loading in a sensor
web browser 1190
C.-Y. Huang and S.H.L. Liang
- Spatial inference with an interchangeable rule format 1210
R. Nikkilä, E. Nash, J. Wiebensohn, I. Seilonen and K. Koskinen
- An efficient measure of compactness for two-dimensional shapes and its application
in regionalization problems 1227
W. Li, M.F. Goodchild and R. Church
- Broad area mapping of monthly soil erosion risk using fuzzy decision tree approach:
integration of multi-source data within GIS 1251
L. Ai, N.F. Fang, B. Zhang and Z.H. Shi
