KING MONGKUT'S INSTITUTE OF TECHNOLOGY LADKRABANG

CONTENTS

	Page
Research Articles:	
Model of Peacock Tail Covert Feather Based on Its Microscopic Structure	91
Chinawat Vilasineewan, Suchada Siripant and Wina Meckvichai	
A Perturbation Result for Bounded Solutions of Linear Differential Systems under the Integrable Dichotomy Condition	96
Parinya Sa Ngiamsunthorn	
Downscaling Geopotential Height Using Lapse Rate	101
Chiranya Surawut and Dusadee Sukawat	
An Approximation of a Linear Advection Equation using the Meshfree Method	111
Amorn Koomsubsiri, Dusadee Sukawat and Suwon Tangmanee	
Regional Climate Downscaling by Artificial Neural Network	118
Wachiraporn Permpoonsinsup and Dusadee Sukawat	
An SIR Epidemic Model with Gravity in Patchy Environment: Analyses for Two Patches System	127
Sompon Puangsun and Klot Patanarapeelert	
The Simulation of Effect of Fin on Natural Convection in Porous Non-uniformly Heated Triangular Cavities	134
Paweena Khansila and Supot Witayangkurn	
Visualization of Conjugate Natural Convection in a Square Enclosure Divided by Conducting Partition	144
Pensiri Sompong and Supot Witayangkurn	

Robust Control with Finite Time Convergence for Flexible Spacecraft Attitude Tracking	153
Kanoktip Kotsamran and Chutipon Pukdeboon	
Switching Law of a Three Second-order Linear Time Invariant Switched System	163
W. Wattanapanich and T. Mouktonglang	
Some Remarks on Visible Actions on Multiplicity-free Spaces	172
Atsumu Sasaki	
A Survey of Extremal Rays for Fano Manifolds	176
Toru Tsukioka	
Natural Convection in a Porous Square Enclosure with Partially Cooled from Vertical Wall	180
Wiratchada Kalaoka and Supot Witayangkurn	
Local Stability Analysis of Mathematical Model for Hemorrhagic Conjunctivitis Disease	189
S. Sangsawang, T. Tanutpanit, W. Mumtong and P. Pongsumpun	
Forecasting Model for Para Rubber's Export Sales	198
Tatiporn Pattranurakyothin and Kanchana Kumnungkit	
Instructions for Authors	i
