Industrial-scale production of polyglycolic acid

Environmentally resistant conductive polymer hybrids

The Society of Polymer Science, Japan

nature publishing group 

# Polymer Journal

Volume 46, Number 11, November 2014

## INVITED REVIEWS

- 745 **Functional Polymers**  
**Development of die-bonding film by nano-structure control and mathematical optimization**  
Teiichi Inada
- 751 **Self-assembled Materials**  
**New strategies and implications for the photoalignment of liquid crystalline polymers**  
Takahiro Seki **OPEN**
- 769 **Polymer Engineering**  
**Development of an industrial production technology for high-molecular-weight polyglycolic acid**  
Kazuyuki Yamane, Hiroyuki Sato, Yukio Ichikawa, Kazuhiko Sunagawa and Yoshiki Shigaki

## FOCUS REVIEWS

- 776 **Self-assembled Materials**  
**Development of low-molecular-weight gelators and polymer-based gelators**  
Kenji Hanabusa and Masahiro Suzuki
- 783 **Morphology control of molecular assemblies prepared from bio-based amphiphilic polymers with a helical hydrophobic unit and application as nanocarriers for contrast agents and/or drug delivery**  
Akira Makino

## ORIGINAL ARTICLES

- 792 **Polymer Structures**  
**Core/shell-like structured ultrafine branched nanofibers created by electrospinning**  
Makoto Konno, Yuuko Kishi, Manabu Tanaka and Hiroyoshi Kawakami
- 800 **Functional Polymers**  
**Preparation of environmentally resistant conductive silica-based polymer hybrids containing tetrathiafulvalene-tetracyanoquinodimethane charge-transfer complexes**  
Hiroshi Okada, Kazuo Tanaka and Yoshiki Chujo
- 806 **Self-assembled Materials**  
**Cholesteryl-modified poly (monomethyl itaconate)s micelles as nano-carriers for pH-responsive drug delivery**  
Zhaleh Pourmoazzen, Massoumeh Bagheri and Ali Akbar Entezami
- 813 **Biopolymers, Bio-related Polymer Materials**  
**Urethane foam of sulfated polysaccharide ulvan derived from green-tide-forming chlorophyta: synthesis and application in the removal of heavy metal ions from aqueous solutions**  
Kenichi Kanno, Yoshihiro Fujita, Satoshi Honda, So Takahashi and Satoshi Kato

Contents continued ...

NOTES

- 819 **Physical Properties of Polymers**  
**Effects of molecular weight on the local deformation of photo-cross-linked polymer blends studied by Mach-Zehnder interferometry**  
Tomoya Kawamoto, Dan-Thuy Van-Pham, Hideyuki Nakanishi, Tomohisa Norisuye, Qui Tran-Cong-Miyata and Koji Fukao
- 823 **Polymer Engineering**  
**Effect of cladding layer glass transition temperature on thermal resistance of graded-index plastic optical fibers**  
Hirosugu Yoshida, Ryosuke Nakao, Yuki Masabe, Kotaro Koike and Yasuhiro Koike

Cover Illustration – Volume 46, No. 11 (November 2014)

**New strategies for photoalignment of liquid crystalline polymers possessing various architectures.**  
Takahiro Seki,  
*New strategies and implications for the photoalignment of liquid crystalline polymers on page 751.*
