## Special Issue: Biorelated Polymers and Materials

The August special issue of *Polymer Journal*, Biorelated Polymers and Materials, is a collection of reviews and original articles that examine and investigate biological and biomedical polymers for materials science and engineering. We would like to thank Professor Takeshi Serizawa for planning and coordination of this issue as special issue editor.

### EDITORIAL

- 435 **Special Issue: Biorelated Polymers and Materials**  
Takeshi Serizawa

### FOCUS REVIEWS

- 436 **Biopolymers, Bio-related Polymer Materials**  
**Hemocompatibility of zwitterionic interfaces and membranes**  
Mei-Chan Sin, Sheng-Han Chen and Yung Chang
- 444 **Recombinant elastomeric protein biopolymers: progress and prospects**  
Monica S Tjin, Pearlie Low and Eileen Fong
- 452 **Phenolic film engineering for template-mediated microcapsule preparation**  
Hirotaaka Ejima, Joseph J Richardson and Frank Caruso
- 460 **Surface engineering of nanoparticles for therapeutic applications**  
Kenya Kobayashi, Jinjian Wei, Ryo Iida, Kuniharu Ijiro and Kenichi Niikura
- 469 **Development of functional polyplex micelles for systemic gene therapy**  
Kensuke Osada
- 476 **Design of gene-activated matrix for the repair of skin and cartilage**  
Chunfen Wang, Lie Ma and Changyou Gao
- 483 **New directions in the design of phenylboronate-functionalized polymers for diagnostic and therapeutic applications**  
Akira Matsumoto, Kazunori Kataoka and Yuji Miyahara
