PROGRESS IN PHYSICAL GEOGRAPHY

VOLUME 38, ISSUE 2, 2014

Contents

Articles

- Moderate seismic activity affects contemporary sediment yields 145
Matthias Vanmaercke, Albert J. Kettner, Miet Van Den Eeckhaut, Jean Poesen, Anna Mamaliga, Gert Verstraeten, Maria Rădoane, Florin Obreja, Phaedra Upton, James P.M. Syvitski, and Gerard Govers
- A review of methods for estimating the contribution of glacial meltwater to total watershed discharge 173
Jeff La Frenierre and Bryan G. Mark
- Assessment of the effects of biophysical and anthropogenic factors on woody plant encroachment in dense and sparse mountain grasslands based on remote sensing data 201
Maite Gartzia, Concepción L. Alados, and Fernando Pérez-Cabello
- The Australian tsunami database: A review 218
James Goff and Catherine Chagué-Goff

Progress report

- Estimating evaporation based on standard meteorological data – progress since 2007 241
Murray C. Peel and Thomas A. McMahon

Classics in Physical geography revisited

- Physical geography on the methodological fence: David Stoddart (1965) *Geography* and the ecological approach: The ecosystem as a geographic principle and method. *Geography* 50: 242–251 251
George P. Malanson

Research resource review

- 259
