PROGRESS IN PHYSICAL GEOGRAPHY

VOLUME 38, ISSUE 6, 2014

Articles

- Unravelling interactions between salt marsh evolution and sedimentary processes in the Wadden Sea (southeastern North Sea) 691
Mark Schuerch, Tobias Dolch, Karsten Reise, and Athanasios T. Vafeidis
- Interactions between riparian vegetation and fluvial processes within tropical Southeast Asia: Synthesis and future directions for research 716
Helen L. Moggridge and David L. Higgitt
- A classification for macroscopic charcoal morphologies found in Holocene lacustrine sediments 734
Colin J. Courtney Mustaphi and Michael F.J. Pisaric
- Object-based extraction of bark beetle (*Ips typographus* L.) infestations using multi-date LANDSAT and SPOT satellite imagery 755
Hooman Latifi, Fabian E. Fassnacht, Bastian Schumann, and Stefan Dech
- On the effect of natural resources on interstate war 786
Rafael Reuveny and Katherine Barbieri

Progress report

- Recent methodological advances in Quaternary palaeoecological proxies 807
Michael E. Meadows

Classics in physical geography revisited

- A classic examination of fluvial processes and forest patterns: Victor Ernest Shelford's (1954) 'Some Lower Mississippi Valley Flood Plain Communities: Their Age and Elevation'. *Ecology* 35(2): 126-142. 818
Kimberly M. Meitzen
