RESEARCH ARTICLES

Articles

981

Replication and trafficking of a plant virus are coupled at the entrances of plasmodesmata

Jens Tilsner, Olga Linnik, Marion Louveaux, Ian M. Roberts, Sean N. Chapman, and Karl J. Oparka

The tumor suppressor CDKN3 controls mitosis 997

Grzegorz Nalepa, Jill Barnholtz-Sloan, Rikki Enzor, Dilip Dey, Ying He, Jeff R. Gehlhausen, Amalia S. Lehmann, Sujung Park, Yanzhu Yang, Xianlin Yang, Shi Chen, Xiaowei Guan, Yanwen Chen, Jamie Renbarger, Feng-Chun Yang,

The spindle checkpoint, APC/CCdc20, and APC/CCdh1 play distinct 1013 roles in connecting mitosis to S phase

Linda Clijsters, Janneke Ogink, and Rob Wolthuis

1027 The dynamics of engineered resident proteins in the mammalian Golgi complex relies on cisternal maturation

Riccardo Rizzo, Seetharaman Parashuraman, Peppino Mirabelli, Claudia Puri,

1037

Cyclin-dependent kinases regulate splice-specific targeting

of dynamin-related protein 1 to microtubules Stefan Strack, Theodore J. Wilson, and J. Thomas Cribbs

Complete integrin headpiece opening in eight steps 1053

Jieging Zhu, Jianghai Zhu, and Timothy A. Springer

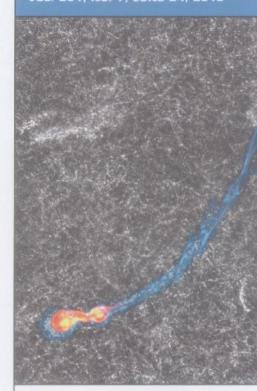

1069 Physical limits of cell migration: Control by ECM space and nuclear deformation and tuning by proteolysis and traction force

Katarina Wolf, Mariska te Lindert, Marina Krause, Stephanie Alexander, Joost te Riet, Amanda L. Willis, Robert M. Hoffman, Carl G. Figdor,

Stephen J. Weiss, and Peter Friedl

VOL. 201, NO. 7, JUNE 24, 2013

On the cover

Wolf et al. explore the physical limits of cell migration. A cell labeled for F-actin (cyan) tries to move its nucleus (red/ yellow) through a high-density lattice of rat tail collagen (grey) in the absence of matrix metalloproteinase activity. Image © 2013 Wolf et al. See page 1069.

Corrections

1085

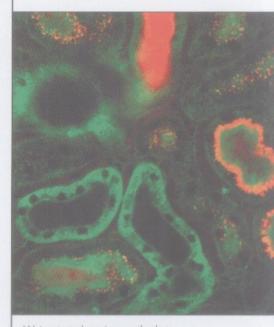

Desmosomal cadherins utilize distinct kinesins for assembly into desmosomes

Oxana E. Nekrasova, Evangeline V. Amargo, William O. Smith, Jing Chen, Geri E. Kreitzer, and Kathleen J. Green

1087

FBH1 promotes DNA double-strand breakage and apoptosis in response to DNA replication stress

Yeon-Tae Jeong, Mario Rossi, Lukas Cermak, Anita Saraf, Laurence Florens, Michael P. Washburn, Patrick Sung, Carl L. Schildkraut, and Michael Pagano

Weigert et al. review methods to image subcellular events in living animals, including the internalization of systemically injected fluorescent markers into small endocytic vesicles (red) in the proximal tubuli of mouse kidneys. Cell membranes are labeled green.
